Amruth Krishnan M

amruth.krish007@gmail.com — +91 81380 30975 — Linkedin — Portfolio — Kerala, India

Professional Summary

Motivated MCA graduate and aspiring Software Engineer with strong knowledge of Python, Java, Data Structures & Algorithms, DBMS, and Machine Learning. Experienced in developing AI- and IoT-based projects through academic and personal initiatives. Passionate about solving real-world problems, learning new technologies, and building efficient, scalable software solutions in a collaborative environment.

Technical Skills

- **Programming Languages:** Python, Java, C, C++, JavaScript, Node.js
- **Databases:** SQL, Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, RDBMS
- **Web Technologies:** HTML, CSS
- **Technologies:** Machine Learning, IoT, Deep Learning
- **Tools & Platforms:** Linux, MS Office, Android Studio, Arduino, Git, VS Code
- **Concepts:** Software Engineering, Software Development Life Cycle, DSA, OOP, DBMS

Education

Master of Computer Applications (MCA) 2024 – 2026
APJ Abdul Kalam Technological University (KTU), Kerala
CGPA: 8.48

B.Sc. Computer Science 2021 – 2024
University of Calicut, Kerala
CGPA: 8.133

Class XII 2021
Board of Higher Secondary Examinations, Kerala
Percentage: 89.91%

Class X 2019
Central Board of Secondary Education (CBSE)
Percentage: 83.4%

Projects

Wild Alert: Real-Time Wildlife detection and Alert System GitHub
- Engineered a real-time wildlife detection system using YOLOv8 to identify animals and vehicles from live camera feeds and analyzing potential collision risks.
- Integrated an IoT-based alert mechanism using ESP8266 and MQTT to trigger roadside warnings (LED, buzzer, LCD) for preventing animal–vehicle accidents.

Personal Posture Evaluator GitHub
- Developed a real-time posture evaluation system using computer vision and pose estimation to analyze body movements and provide accuracy-based scoring.
- Implemented exercise and yoga tracking with rep counting, posture feedback, and voice guidance using a Flask-based web interface.

Waste Classifier and Disposal Recommendation System GitHub
- Created a deep learning-based system to classify waste using Convolutional Neural Networks (CNNs).
- Enhanced sustainability by enabling intelligent and eco-friendly waste sorting.

Smart Shopping Cart (IoT + RFID) GitHub
- Built an IoT-based smart cart using RFID technology for automated product detection.
- Designed a web interface for real-time cart updates and automated billing display.

Certifications

- Machine Learning Onramp – MathWorks
- Generative AI – Google Cloud
- Cyber Security – IBM
- Android Development with Compose – Google
